

Dear colleagues, dear residents,

We are pleased to announce that our next webinar will take place on **Wednesday, 18 October 2023** at **17:00-18:00 CEST**.

One pathology series: Clinical pathology-histology correlates of liver disease

"The integration between clinical and anatomical pathology in veterinary medicine provides a comprehensive understanding of disease processes, as it combines diagnostic information from blood tests and tissue examinations, facilitating accurate diagnoses and tailored treatment plans for animal patients.

Our inaugural session of the "One pathology" series will feature the liver.

Join Dr. Mary Anna Thrall and Dr. Pompei Bolfa (both from Ross University School of Veterinary Medicine, St. Kitts), for an hour of discussion on liver disease in small animals. Clinical pathology correlations with anatomical pathology findings will be presented and interpreted."

Please register in advance for this meeting under this link:

<https://us02web.zoom.us/join/register/tZYpcO2ppzovE9Kw5SA628Jkx-teScb-Ft24#/registration>

The webinar will be presented via the professional version of Zoom. You should promptly receive an email with the access details (originating from <no-reply@zoom.us>), please check your spam folder or get in touch with Annabelle-Heier@idexx.com.

Best wishes

The ECVP-ESVP webinar team
