

SYNLAB Vet is part of an expanding international laboratory diagnostic company based mostly in Europe. SYNLAB Vet has five veterinary laboratory sites in Germany. Our clients include Veterinarians, Veterinary Practices and Veterinary Hospitals. We focus on a client-centered high-quality service and close collaboration between our Teams and Laboratory sites. The Augsburg site is the largest and is situated in the south of Germany, near Munich.

Diagnostic veterinary clinical pathologist / cytologist

Type of position: Full-time (40h) or part time (30h), on-site preferred (Augsburg, Germany)

Duties will include:

- Diagnostic cytology reporting: Our caseload includes mainly small animal, with an expanding proportion of equine submissions from a range of practices including primary clinicians and referral hospitals.
- Specialist advice and case related phone consultation to referring veterinarians
- Project work
- Support to the quality management

Requirements:

- Professional degree in veterinary medicine
- Further training in Veterinary Clinical Pathology / Cytology. Ideally the candidate is board certified in Veterinary Clinical Pathology (DECVCP/DACVP Clin Path) or a national degree in Veterinary Clinical Pathology (e.g. Fachtierarzt/-ärztin für klinische Laboratoriumsdiagnostik). Candidates with completed training preparing for exams in any of the above will be considered.
- Relevant experience in veterinary cytology and hematology
- Excellent spoken and written German language (reporting in German)

To the successful candidate we offer a permanent employment with a competitive salary commensurate with experience with excellent benefits and working conditions. We are looking for a highly motivated, proactive and responsible individual to join our ambitious and dynamic team.
